GETTING TO KNOW EACH OTHER

JP Piping Systems Pty Ltd is the Leading Supplier and Installer of Plumbing and Mechanical Piping in the Mining, Sugar, Ports and Construction Industries.

Specialising and experienced in mechanical piping supply and installation with a Zero LTI Safety Record, we provide on time delivery, with local stock availability, ensuring you get the product you want, when you want it, installed on time and on budget.

WHAT WE DO

OVER 23 YEARS' EXPERIENCE:

To date we have successfully piped out over 25 Coal Preparation plants, as well as many Ship Loaders, Stackers/Reclaimers, Industrial Workshops, Fuel Farms and Fire Systems.

- > Supply
- > Fabrication
- > Installation
- > Maintenance
- > Plant & Equipment Hire

WE SUPPLY & INSTALL: AUSTRALIA WIDE

- > Specialised projects such as Dust Suppression, Water, Air Systems, Fire Systems, Fuel systems for Ship Loaders, Stackers/Reclaimers, Wash Plants and Industrial Workshops.
- > Compressed air and pneumatics (Compressors, Driers, Receivers and Valves)
- > Poly Lines
- > Pump Installations
- > Shut down services for all types – Mining and Manufacturing Industries
- > Steel, Copper, Stainless Steel, Galvanised Pipe Work
- > Industrial plastic piping systems
- > Filters and Valves
- > Minor Civil and Concrete works

INDUSTRIAL PLASTIC PRODUCTS

JP Piping Systems Pty Ltd is the Nth QLD Distributor for +GF+, one of the largest manufacturers of industrial plastic piping systems in the world.

- > PVC-U & PVC-C Systems
- > Polyethylene Electro-Fusion Fittings, Butt-Weld Fittings, Compression Fittings
- > WAGA DI Mechanical Repair Couplers
- > Contain-It Dual Containment Systems
- > Cool-Fit Pre-Insulated Systems
- > Polypropylene / PVDF Systems
- > A full range of Manual and Actuated Plastic Valves
- > +GF+ Signet Instrumentation (Flow, Pressure, Temperature, Level and Analytical Measuring & Monitoring)
- > Ancillary Equipment / Machines and Tools

WE DELIVER WHAT IS IMPORTANT:

- > Excellent Safety Records & Systems (Zero LTI's)
- > Quality Workmanship
- > Knowledge, Skills & Experience in Mechanical Plumbing
- > Personalised Service
- > On Time Delivery
- > Local Stock Availability
- > Well Established Third Party Certified HSEQ Management Systems

EQUIPMENT

We have maintenance programs and records for all plant & equipment; which ensures we consistently work safely and efficiently, with no down time.

- > 22T Excavator
- > Backhoe
- > Telehandler with Reverse Camera
- > Hydro Vac Trailer & Tip Truck
- > Hydrostatic Testers
- > Butt Welders
- > Electro Fusion Machine with data logging that logs our welding procedures to ensure we have proper welding results. This equipment has GPS to track where and when we have welded the fittings for Quality Assurance (if required)
- > Cable, pipe and existing underground services location device
- > Workshop Facilities for fabrication

STEEL PRODUCTS

- > Stainless Steel Press-Fit and Threaded Systems
- > Stainless Steel and Galv. Roll Groove Systems
- > Black and Galv. Steel Systems
- > 3000lb Black and Galv. Steel Systems
- > Instrumentation and Air Tube Systems
- > A full range of Manual and Actuated Metal Valves
- > Bracketing, Clips and Fasteners

Thiess Constructions Safety Award 2014

Winner – MAIN Safety Award 2012

Thomas & Coffey Safety Award 2012

Winner – GF Distributor of the Year 2008

TESTIMONIALS

"Thiess engaged JP Piping Systems from late 2013 to early 2014, to undertake piping works for the following facilities at the Caval Ridge Mine Site. Installation of Heavy Vehicle & Light Vehicle Wash Stations and Refuelling Stations. Material & equipment was supplied by the client for acceptance & installation by the contractor. Through astute management and knowledge of the scope of works, JP Piping Systems was able to identify potential problems, propose efficient ways of completing works and manage any issues before they arose. Their expertise in piping construction and their willingness to make sure all works were completed correctly, on time and in a safe manor was invaluable. JP Piping demonstrated and committed to a Safety Culture aligned with Thiess' values. Their safety performance on site was recognised at a company level with the receipt of our Safety Award as well as individual performances at daily prestarts. Based on their performance on the above project, I would not hesitate to recommend them for future work of this nature."

Mark Bombardieri, Project Manager, Thiess Pty Ltd
